

DOCTOR WARRICK

CARDIOLOGIST | AUTHOR | CHANGEMAKER | EDUCATOR

Doctor Warrick Bishop is a practising cardiologist, best selling author and key-note speaker who is passionate about helping to prevent heart disease on a global scale. Warrick graduated from the University of Tasmania, School of Medicine, in 1988. He completed his advanced training in cardiology in Hobart, Tasmania, becoming a fellow of the Royal Australian College of Physicians.

A number of years ago something incredible, an amazing coincidence, happened that started Doctor Warrick Bishop on the mission to prevent heart attacks rather than try to cure them. He was driving to work one day when he stopped at a commotion by the side of the road. A fun runner had collapsed during a fun run with a heart attack. He helped in his resuscitation only to find out that had seen the very same man two years earlier and reassured him that he was fine.

That meant that he had reassured a patient based on treadmill testing, the best care available at the time that he was fine, only to be part of the team that resuscitated that man when he dropped dead during a running race, this was just not good enough, and he asked himself could this be done differently?

It became clear to Warrick the more precise we can be in the information we have in regard to a patients heart health and real risk of heart attack, the better we can look after that person, it seems so obvious when you say it like that, but that opportunity is still only new and not broadly utilised in the medical community.

Dr Warrick Bishop MBBS, FRACP, Cardiologist, #1 International Best Seller

Warrick's Most Popular Keynote Presentations Include:

- Statins and your heart
- How do we predict risk of heart attack and can we do better?
- What is a "Heart Attack"?

Warrick's Most Popular Media Topics Include:

- What is Cardiac CT Imaging and how can it help?
- Why all the fuss about blood pressure?
- Is family history important in blood pressure?
- What are the limitations of stress testing to assess for heart disease?
- What can you do to reduce your risk of heart attack and stroke?
- What's the difference between a palpitation, a valve problem, and a blocked artery?
- What if you have side effects taking medications?

Kind Words & Praise

"... I applaud you in writing this book. You cover an extremely important topic **as one in two people will have coronary vascular disease and one in three will die from it.**"

Dr. Daniel Friedman
Consultant, Imaging and Interventional
Cardiologist at Prince of Wales Private and
Public Hospitals

"**If I can ask you to do one favor to save a life**, it is to pass along this book to someone else who can act on it once you are done."

Matthew Budoff MD
Chair of Preventive Cardiology Los
Angeles Biomedical Research
Institute

"The bad news is, that in Australia, heart failure is the cause of more than **30 percent of deaths every year** and most of these are due to coronary heart disease. This book confronts that stark reality in a readable, informative and practical way."

Charles Wooley
Journalist, Writer & Reporter
for 60 Minutes

"We Can Do Better."

- ♥ Don't guess about your risk of heart attack!
- ♥ What if the single biggest killer in the Western World was lurking inside of you?
- ♥ **It's Simply Not Good Enough!**
According to the Heart Foundation, about **55,000** Australians suffer from a heart attack **every year**. There is a better way to prevent this from happening.
- ♥ We have unprecedented opportunities to look earlier and safer into our coronary arteries.
